- Not Required<sup>(24)</sup> . . . . . (\$100)

**Total Retail Value \$** \_\_\_\_\_

**NOTES**

- 1 Seat-to-floor height is measured at the front of the seat pan based on a standard seat size. Seat to floor heights may vary +/- .25" dependent on conditions of the power base and on seat depths greater than 18". Suspension castors may affect seat-to-floor height up to an additional .5"-1".
- 2 Weight limit is 225lbs.
- 3 Uses 2 U1 Batteries
- 4 Systems are designed for use with a 2"-3" cushion.
- 5 Back angle is adjustable from 76° to 116° degrees in increments.
- 6 These systems are not available over 20" wide by 20" deep and increase seat to floor height. Elevating systems use 2-22NF batteries. Group 24 batteries are available for the TDX and TDX-SP upon request.
- 7 TDX-SP base must have the TRO (Transport ready option) if utilizing a vent and elevating seat module.
- 8 RFQ required for this seat size on M71.
- 9 RFQ required for this seat size on M71, 1103, 1107, 1113 ATS.
- 10 We highly recommend a 3G - Long base for optimal maneuverability
- 11 3G - Long base must be used for these seat depths.
- 12 May be used as an interface for after market backs.
- 13 This option allows the back angle to adjust from 81° to 121° in increments.
- 14 When omitting the back there may be compatibility issues when using certain aftermarket back and/or lateral options. When using these arms with endomorph or mesomorph canes the lowest arm setting is 13.5".
- 15 Laterals are not available with the MaTRx PB Backs.
- 16 Standard front rigging will only be provided when specified. Please provide or order separately.
- 17 Includes a flip up foot platform. May increase seat-to-floor height.
- 18 90° front rigging will collide with front casters on the P220, S525, S646 and 3G Storm.
- 19 The increased weight of this option reduces the weight capacity by 20 lbs on the M71, 1107, 1103, 1113 ATS.
- 20 Under normal usage Power Legrest actuators tend to be louder than Tilt/Recline Actuators.
- 21 Individual legs count as two functions.
- 22 Heavy duty durable construction (4.5lbs ea.).
- 23 Batteries may be required at time of installation, please call to confirm.
- 24 Elevating seat systems must be installed by Motion Concepts.
