COURSE DATES:

Thursday, March 3, 2022

12:00 pm – 1:00 pm EST

Thursday, April 7, 2022

12:00 pm – 1:00 pm EST

Thursday, May 5, 2022

12:00 pm – 1:00 pm EST

Thursday, June 2, 2022

12:00 pm – 1:00 pm EST

Thursday, July 7, 2022

12:00 pm – 1:00 pm EST

Thursday, August 4, 2022

12:00 pm – 1:00 pm EST

THE COMPLETE SOLUTION:

Seating for all that matters in the LTC and community

Seating and mobility equipment are the essential components of our clients' environment. The majority of long-term care (LTC) clients are wheelchair users who spend 12-16 hours a day sitting. Seating is intimately linked to personal comfort, function, and safety. Over the past couple of decades, seating has evolved into a high-tech and an evidence-based field, yet the developments have not been fully integrated into healthcare.

How can seating design help with prevention of falls, infections, and pressure injuries? Can the improved seating comfort translate to the reduction of pain, less medications, and lower incidence of responsive behaviors?

Properly selected seat cushions provide not only skin protection but may also reduce the risk of falls. Appropriately prescribed and adjusted cushions and backrests may improve comfort and sitting tolerance, facilitate mobility, independence and social interaction. Incorporating the latest developments in chemistry and textiles, seating products also provide an unprecedented level of infection control.

We will talk about the matters important in the LTC and create links between various disciplines and the world of seating mobility. This presentation will focus on the major quality metrics of the LTC industry that may be addressed by an evidence-based seating and mobility design. But most importantly, we will talk about seating as an area that may lower the numbers of preventable incidents and health complications.

✓ Invacare Corporation is accredited by IACET as a provider of continuing education and training courses compliant with ANSI/IACET 2018-1 Standard for Continuing Education and Training. Upon completion of the Educational Session and Course Knowledge Assessment* a 0.1 Continuing Education Units (CEUs) will be awarded to individuals for attending 1 hour of instruction. (*80% achievement or greater on the Course Knowledge Assessment is required to receive CEU Certificate).

Presented by: Anna Sokol, RN, MN, BScN, BScKin is the Invacare® Matrix® Clinical Education Specialist for Canada. Anna is a Registered Nurse with Emergency, SCI Rehabilitation, and Community care experiences. In her previous role, she was overseeing provision of nursing, therapy, and personal support services to clients living at home and those receiving long-term care at group homes and retirement residences. Anna has in-depth knowledge of the quality metrics reportable to the Ministries of Health in different jurisdictions. She is offering her expertise in the area of seating and mobility by creating bridges between the disciplines and specialties. From infection prevention and control to fall prevention; from client satisfaction to occupational safety of caregivers, Anna is able to explain how attention to seating and understanding of the latest evidence may offer the missing piece of the puzzle in client safety.
